COMPANY : GEMA ELEKTRO PLASTİK
SUBJECT : REACH (No. 1907/2006)

GEMA ELEKTRO PLASTİK – REACH DECLARATION

Dear sir or madam,

GEMA ELEKTRO PLASTİK A.S (GEMA) is a compounder of thermoplastic resins. As a downstream user (DU) of manufacturer/importer products, GEMA assures that the chemical substances used in their manufactured compounds and masterbatches are/will be appropriately registered by our suppliers as required under the REACH regulation. GEMA manufactures thermoplastic compounds that are blends (preparations) of polymers, fillers, reinforcements, additives, etc... According to REACH regulation, preparations do not need to be registered separately, provided that the individual components of the preparations are (pre-)registered.

For those substances used, for which GEMA is a downstream user, and thus has no registration obligation, GEMA will contact its suppliers on their current or future registration obligations. We assure that GEMA will not use any product that is not in compliance with REACH regulation.

GEMA strives to meet the standards established by EC Regulation 1907/2006 (REACH) and keep customers updated to ongoing efforts to ensure compliance as new substances are added to the candidate list.

The information held in this document strictly applies only to materials manufactured by GEMA and not to any blends that are subsequently created by customers using GEMA and other third party products that may not be REACH compliant.

Latest SVHC list update: 15.01.2019

THE REACH SVHC LIST IS DYNAMIC AND SHOULD NOT BE ASSUMED THE FINAL REACH CANDIDATE LIST.
